CLARESHOLM LOCAL NEWS

Clareholm Seniors beat Macleod 4 to 3 in a game of hockey on local ice Thursday night.

Ice is being shipped into town from further north. There has not been sufficient cold weather here this winter to freeze ice thick enough for cutting.

Rev. Geo. G. Webber, Grand Chaplain, Col. W. A. Lyndon, Earl Atkinson, and John Edlund are attending the annual sessions of the Grand Lodge 1. O. O. F. at Calgary this week.

Violin Tuition—I am starting a violin class in Clareholm and would be pleased to hear from prospective students. Will teach at pupil's home if desired. For terms and appointment Phone R210.—T. E. Scott.

Pat Anderson's rink is the winner of the Clareholm Curling Cup, the deciding contest having taken place on Thursday night. The rink was made up of A. E. Runions, Chas. Wilson, Harry Wyatt, D. A. Anderson skip.

The monthly meeting of U. F. W. A. Local No. 204 will be held on Friday, February 20, at 3 o'clock, in the rest room. As this is the first meeting this year, let everyone make a special effort to be out. Everyone welcome.—Sec.

A basket social and dance will be held by the U. F. A. and U. F. W. A. of Starline Local at the home of Freeman Anderson on Friday evening, February 19. Everybody is invited. Come and have a good time.—Program Committee.

There have been three or four days of moderately cold winter weather here during the past week, the coldest being Sunday morning when the mercury dipped to three degrees below zero. About three inches of snow fell during the storm.

Harry Carey in "The Bad Lands" at the Rex theater Friday and Saturday nights this week. "In Hollywood with Potash and Perlmutter" Monday and Tuesday next. This is from the stage success, "Business Before Pleasure" by Montague Glass and Jules Eckert Goodman.

Everyone will want to see the Prince of Wales tour film at the Rex theater the last three days of next week. It shows Africa and South America exactly as the Prince saw these countries. This town is fortunate indeed to have an opportunity to see this picture on its first appearance in Canada.

George Henry Lambie, an oil timer of this district, died at Nelson, B. C., on February 15th, aged 66 years. The funeral service will be held in St. Andrew's United church, Clareholm, on Saturday afternoon, February 20, at 2 o'clock, the remains having been shipped here for burial.

Dr. A. D. MacGregor of Clareholm, and Miss Helen Fair of Calgary, were united in marriage at Calgary on Wednesday, February 18. The young couple are well known and popular in Clareholm, the groom being engaged to the daughter of his profession here, and the bride having been formerly on the teaching staff of the school here. Their many friends extend best wishes.

The Ladies' Aid of the Lutheran church will hold a sale of work and plain box social at the home of Freeman Anderson, on Friday evening, February 20, at 8 o'clock. The boxes will not be auctioned off but will be sold at the uniform price of 75 cents each. Ladies will please bring lunch in plain boxes with their names on slip enclosed in sealed envelope. There will be a fish pond and a grab tub. Everybody welcome.

Owing to Manager Edlund being right on the job at Calgary on Thursday, he was able to secure for the Rex theater, Clareholm, the Prince of Wales tour film for the only three days open in Alberta. It comes here direct from a successful run in Calgary and through Manager Edlund's enterprise will be shown in Clareholm before its appearance in Edmonton and Winnipeg. It will be at the Rex theater next Thursday, Friday and Saturday nights, and also for afternoon matinees.

SUCCESSFUL ELKS' DANCE

On Friday evening last, the opening public social event put on by the Clareholm Elks, was held in the Odd Fellows' Hall, in the form of a Valentine Dance.

Although stormy and disagreeable weather prevailed, over four hundred enthusiasts braved the elements, and it is safe to say, enjoyed one of the most successful events ever staged in Clareholm. The hall was fittingly decorated with the lodge's colors of purple and white, together with elk heads and valentine decorations, which gave the room the appearance of a palace of joy. The Elks were there in their nifty uniforms and to them is due the credit of seeing to it that all visitors were cordially met and well taken care of.

Dancing commenced at 9:30 to the music of Mack's Melody Makers, six piece orchestra, and was carried on into the wee small hours of the morning. This orchestra was proved the success of any to which the people of Clareholm have had the pleasure of dancing this season.

At intermission, lunch was served by a well organized committee of Elks, and the large attendance was well and adequately served, without a hitch, and of great deal of credit is due to the organizer of this department.

After lunch the prizes which were to be given away to the holders of the lucky tickets were drawn. Glen Lewis, of Clareholm, was winner of the first prize, which was a handsome floor lamp, and Mrs. J. T. Campbell, of Woodville, the winner of the second prize, a beautiful Indian blanket.

During the dancing, novelty hats and caps were distributed which gave the crowd a gay appearance, and the balloon dance was a big source of fun. Miss Lucile Jones, of Slavey, was presented with a fancy box of chocolates as a reward for being the last lady on the floor with the balloon still intact.

The absence of any objectionable features, and the apparent good will among all present, crowned the event with success, and the E. P. O. E. of Clareholm has to be commended and congratulated on such a paramount social event.

It is the intention of the Elks to give another dance on March the 17th.

Films of Royal Tour Are Very Interesting

(Calgary Albertan)

Not only the immense popularity of the royal British prince, which as reached to every corner of the globe—but the scenes in Gambia, the Gold Coast of West Africa, Sierra Leone, Nigeria, Cape Colony, the Transvaal and Rhodesia, as well as in the South American countries, Uruguay, Argentina and Chile, have an intense appeal to Canadians where all these countries are but names on the map, so that the pictures which depict every important incident of the Prince of Wales' tour proved to be exceedingly popular at the Regent theater last evening. Fancy seeing all the gatherings of notables and natives, while they are striving to improve his royal highness' trip, their loyalty and importance. For the camera catches every movement of the prince, even the wiping of a perspiring forehead in the heat of the day. The pictures are in every sense an intimate view of the recent travels of the popular British prince.

There is not a dull moment from the opening scene in this picture from the moment when the prince boards the warship in the English Channel until he disembarks at Southampton after his tour. However, a full description of the travels would occupy too much space and it may, be summed up that the two hours spent in viewing the many scenes of the Prince of Wales' tour pass quickly for they are really of absorbing interest and vastly entertaining.

All lovers of good music in Clareholm and district will be interested in the recital to be given in the I. O. O. F. Hall on Friday evening, February 19th, at 8:15 o'clock, by Miss Edna Reed, the widely-known soloist of Edmonton, who has delighted large audiences east and west throughout the Dominion. Miss Reed will be assisted by other artists.

Premier King Scores Big Victory In Prince Albert By-election

Prince Albert, Feb. 16.—For the second time in its history the federal constituency of Prince Albert has elected a premier and leader of the Liberal party as its representative in the house of commons. Prime Minister Wm. Lyon Mackenzie King, following in the footsteps of Sir Wilfrid Laurier, was the successful candidate in the federal by-election held here yesterday and his majority, when complete returns are in, is expected to be close to six thousand. His opponent, Cap. Burgess may lose his deposit.

LETTER TO THE EDITOR

Editor Review-Advertiser.

Dear Sir—Will you please publish the following letter in your paper to the council and people of Clareholm:

I think it is time, in the interest of public health, and in that of the children in particular, that a milk regulating body be put into force in this town. There is no provincial law to this effect, therefore every town has to make and enforce its own regulations in this matter.

We all know of the value of milk as a food, provided it is pure, clean and free from disease germs, and neither skimmed nor watered.

If anyone doubt the need of a milk bylaw in this town, they can be convinced by having a taste made of the milk supplied in the public eating places in this town. Such test can readily be made at the local creamery or at the School of Agriculture.

I would advise the council to get a copy of bylaws in force in some other city or town in this province and incorporate it into this town's bylaws.

This is not written as a spite to anyone, but merely to call public attention to a state of things which should no longer be tolerated.

Canada's mineral output for 1925 is estimated at \$228,440,000, as compared with \$209,586,406 for 1924. The previous record was \$227,209,665 in 1920, when metal prices were about 35 per cent. higher than in 1925.

There are 4,045,760 acres of home-land lands in Manitoba in a radius of 30 miles from railway lines. In all there are 25,286 quarter sections, or sufficient to settle 20,000 families, the bulk of the land being in Eastern Manitoba.

The value of wheat delivered at Western Canadian points from August 1 to December 10, 1925, was \$138,400,000, representing an average cash return to farmers of over \$1,200 per farm. This is a new high record and the returns are greater for the four and a half months than for the entire preceding year.

According to information at Canadian Pacific Railway Headquarters at Montreal, the Canadian cutters who went over to Scotland on the C. P. liner "Montrose" are touring the land of the thistle with success. The Canadians defeated Strathmore and Loch Lomond at Edinburgh. J. G. Macdonald, of Fort William, was still undefeated.

The whole company of "The Three Little Maids," an English musical comedy starring the famous British comedian G. P. Huxley, arrived at the C. P. R. Windsor Station, Montreal, recently, and grouped themselves round an engine for a novel photograph. The show is due in Ontario during the months of February and March.

A settlement, to be known as the Clan Donald colony, comprising 10 families and covering 30,000 acres of land, will be established near Vermilion, Alberta, this spring, through a joint contract entered into by the Canadian Pacific Railway, the Overseas Settlement Committee and the Scottish Immigrant Aid Society. The railway has purchased the land and the Scottish Immigrant Aid Society is to secure the immigrants.

According to A. A. Harcourt, Secretary of the Soldiers' Rehabilitation Committee at Montreal, fine work has been done in the placing of many returned men in good positions. There are still about 800 returned soldiers, married and living in Montreal, who are out of work, but many of these will be placed in the model city of Arvida, which is being constructed by the Aluminum Company of America in the Lake St. John district in Quebec.

Alfred B. Devenish has been appointed manager of the Royal Alexandra Hotel, Winnipeg, to succeed S. E. Pierce who has gone to the Vancouver Hotel, according to an announcement by the Canadian Pacific Hotel Department. Mr. Devenish joined the Canadian Pacific Hotel Department in 1912 and was later assistant and assistant manager at the Place Viger Hotel in Montreal. He will leave the Algonquin Hotel at St. Andrews, N.B., where he has been manager, to go to Winnipeg.

A wide and distinguished galaxy of speakers from Great Britain, France and the United States is announced for the third triennial National Conference on Education, to be held in Montreal April 8 to 9 next. Among those named are: The Duchess of Atholl, Parliamentary Under-Secretary to the British Board of Education, Sir Henry Walford Davies, Chairman of the National Council of Wales of Wales; Senator Andre Honorat, former Minister of Education at Paris; His Grace, Mgr. Alfred Boudillard, Archbishop of Paris.

During the latter half of the seventeenth century Port Royal, Jamaica, was the wildest spot of earth that was when the "Brethren of the Coast," bands of buccanniers and pirates, made their rendezvous there. Today, the remains of that spot stand away from the land, a dot on the deep blue sea, the mouth of Kingston Harbour. There is a sandy beach which looks like molten gold in the sunshine. There is a wide lagoon which looks like molten glass in the moonlight. Palms, marshalled in orderly rows, line the lagoon. There is an ominous quiet and stillness which belies the names of the various "battles for gold" when, long ago, mahogany-coloured men with cutlasses and forbidding looks, some in furs, others in silks, bearded and Spanish galleons and two, their wealth.

Jamaica is a land of springs and forests, where long before the white man set foot, the native Caribs dined the paradise in which they lived. One of the plant named "cannibals." And, to signify the abundance of good things in the land, the Caribs called the island Xymara.

DEFYING KING FROST AT VICTORIA

Taking a dip in the Sea Water Pool at the Crystal Gardens. The scene is described as a 'winter's day' with people taking a dip in the sea water pool.

The Winter Garden of Canada should be the descriptive title of Victoria, B.C. Why seek south-ern climes when such attractions lie so close at hand? Clear skies, bracing sea air, green lawns and spring blossoms, may all be found there, in mid January. Leaving the prairie grain fields, where next spring's wheat nestles warm beneath a thick blanket of snow, crossing the mountains whose passes are topped by snow buried peaks, here spring in all its wealth of verdure greets the traveller. There is a charm about Victoria harbour, not shared by many. For where landing places generally are unattractive, and a distance from the beauties of the city, the docks of Victoria are a part of its attractions. Very fine is the approach. The short way to the stately old Empress hotel is like the carriage drive to an English castle. On the right are the green lawns fronting Parliament buildings, perhaps the finest in Canada. The rose garden that breaks the even green sward, is even now giving a good account of itself, for numerous rosebuds reveal a pale beauty as if not quite sure whether to burst at once into bloom.

A Visit To Bay Street By The Sea

The magic of the Bahamas has found its way into the hearts of writers and poets. The coloured folk, the gleaming streets, the sunny skies, the great blue sea, many have attempted to picture faithfully. Mark Twain, the immortal American humorist, and Miss Carman, the Canadian poet, are among those who have sung this song of the islands.

"What do you sell, John Camplejohn, In Bay Street by the sea? Oh, turtle-shell is what I sell. In great variety. That fills mankind with peace of mind And soul's felicity? Where can I buy the magic charm Of the Bahaman sea? That fills mankind with peace of mind And soul's felicity? Look from your door and tell me now The color of the sea— When the S.B. Montreal returns from her trip to the West Indies, there will be so many more eager travellers ready to visit John Camplejohn, in Bay Street by the sea, that there will be arranged another cruise from New York, sailing March 1.

Mixed Farming

Growing of Corn to Solve Problems of the Western Farmer

Declaring that the farmer can no longer any hope for a "one-crop farm," G. McLaren, secretary of the Manitoba Corn Growers' Association, told the United Farmers of Manitoba at their annual convention how growth of corn had solved many of the financial problems of farmers in the West. In Manitoba, where land had been abandoned to a great extent because it was "farmed out," McLaren said:

Here are some of the benefits that he said would accrue to the farmer by the growth of corn. Forty acres of land now to pay will provide the farmer with \$1000 yearly, required by the farmers to pay off mortgages and buy machinery. It will solve the problem of how to start diversified farming and prevent exhaustion of the soil. It will help the unemployed population in the province by providing work for the unemployed men after the regular harvesting season. They could be profitably employed at \$40 per month and keep.

Wheat would always be the main crop of Manitoba, Mr. McLaren declared, but he advocated more corn on less acreage, thereby restoring the land by the raising of corn and sweet clover. Contrary to the common belief, corn will provide the farmer with a steady income. In Manitoba and the corn on the yield, a farm land is 20 bushels to the acre, and the farmer can grow the corn, feed it to his stock, and the government is now growing at the government experimental station at Morden, where yields 84, 70 and 62 bushels per acre were garnered from early ripening varieties of corn.

He announced that though short stalks on the corn grown in the province would not allow the farmer to grow the ordinary corn reaper in Manitoba, that this problem had been solved through the invention by the United Farmers of the International Harvester Company of a corn reaper specially adapted for use in Manitoba.

Work would be available to the unemployed men in husking the corn during the early fall and winter months. The farmers of his district were employing a new method for husking corn for the export market, he said, turning them into standard corn bins, where they gained two pounds a bush. "Literally before it is too late," he said in advising that farmers plant fifty per cent. of their total acreage with corn and the other fifty per cent. with sweet clover, his last crop.

Using Costumes Of

Late Russian Czar

Soviet Motion Picture Monopoly Have Bought Elaborate Robes

The royal costumes which clothed the central figure of the monarch of the Imperial court of the last of the Romanoffs are being used in the production of motion pictures under the direction of the Soviet state.

The Imperial robes of Nicholas II, and many other rich articles of his wardrobe form a part of the "proprietor" used in "The Ninth of January," an anti-monarchist film which takes its name from the date in 1905 on which the revolution of that year opened.

Five thousand elaborate Imperial and dress uniforms belonging to the czar and several thousand rich robes, wedding dresses, coronation robes, Chinese and other articles of apparel, were by the former Czar's Alexandra have been bought by the state motion picture monopoly for \$15,000.

All Athletes Do Not Die Young

Veteran Marathon Runner of Ottawa Lived to Be Eighty

From Ottawa comes word of the death, at the age of 80, of Cyril Crepin, famous marathon runner in the '70s. Mr. Crepin won a 10-mile race staged in Ottawa and was also a member of the captain's world champion long foot team which won this title at Montreal, N.S.

The death of the veteran Ottawa man calls attention again to the frequently heard discussion regarding athletes and long life. It will be generally conceded that long athletic careers are about as numerous as a comet in the sky. It was where Mr. Crepin apparently died a lot of it, including, even, a 10-mile event. Yet he lived to be 80, which goes to show, of course, that the story is not so true, as we are so frequently told—Jordan Clites says.

Capital For Investment

Partly as a consequence of the depression in trade and industry, which makes difficult the employment of money in trade, the stock market in London, marked, since the recovery of the embargo on colonial and foreign loans, of almost limitless capital waiting for investment.

Were Early Settlers

Belief That Chinese Settled On Pacific Coast About A.D. 400

Still another belief that settlements had been made upon the North American continent before Columbus' discoveries resulted in European migration was expressed at the 12th annual conference of the British Columbia Library Association.

Miss Alma Russell, of Victoria, B.C., a member of the staff of the province's archival department, in an address on "Work of the International Committee on Intercolonial Cooperation," which met at Brussels last year, said there was evidence in existence to show that a Chinese settlement on the lower mainland of what is now British Columbia, was established in A.D. approximately 1500 years ago, probably near the present site of the city of Vancouver.

The international association, one of whose objects is to add to the intellectual wealth of nations by the exchange of historical documents, and which is sponsored by the League of Nations, will make an attempt to obtain copies of the Journal of Hsing Shing, Chinese Buddhist priest who lived in the fifth century, in an effort to verify belief in the existence of such a colony on the Pacific coast, said Miss Russell.

Recently United States archaeologists expressed the belief that records of the Chinese Buddhist priest who lived in the fifth century, in an effort to verify belief in the existence of such a colony on the Pacific coast, said Miss Russell.

Believe Boys Are

Sensitive As Girls

Use Bluff to Conceal Their Feelings Says Dean of University

Dr. Clark, dean of the University of Illinois, is authority for saying that boys also have emotions. He said that the most sensitive of the boys are more sensitive than girls, that their feelings are more easily injured, that they have a "thinner skin" and are more easily wounded, and that boys have little emotion. "I have come to believe it," says the dean. "The fact is, when you hurt a boy's feelings, he reveals at once all his latent emotions. The boy himself, he gives no evidence of his hurt. He wants, most of all, to have you think he is 'hard boiled,' sophisticated, unemotional by emotion. It would not be surprising to reveal, through his sensitiveness, or emotional feeling. He fabricates tales of his escapades and indiscretions which argue as often as otherwise without basis of foundation, and he does this in order that he may give the impression that he has been insulted, which he has been led to believe is most characteristic of men—Brandon Sun.

Lubrication and Friction

Many Devices Used to Reduce Friction to a Minimum

One day as we were walking through a museum, we saw a man trying to move a heavy stone. They knew only how to drag it along the ground.

A third man, rather thoughtless, watched them. He got an idea; why not put some round pieces of wood between the stone and the ground? The stone was moved with less trouble and work. Man was beginning to overcome friction.

Since then, all sorts of devices have been tried to reduce friction. Ball bearings, roller bearings, and cone bearings, now running in oil, make friction relatively slight.

If the friction of the air and gravitation could be overcome, we would have perfect motion.

Girls Grow Faster Than Boys

Research in the growth of the body for girls, 16 for boys. Girls usually attain their full stature in 20 years, but boys get it 25. It is rare that a girl grows more than after 20 and boys continue even up to 25 years.

Men and women tend to decrease in height after 50 years. The same is true of the spine itself.

An Efficient Drug

"What do you put in this prescription?"

"That I can tell only to the doctor, said the druggist.

"The doctor wants to know. Some I gave you a Chinese laundry ticket and you filled that."—Peabody Star.

Albert: "Where have you been all evening?"

Henry: "Moving pictures."

Albert: "What to the theatre, eh?"

Henry: "No, my wife made me take them down in the parlor and hang them in the disfigurement."

A man has no opposition when he begins to make love to himself.

Wainwright Buffalo

Flourishing in North

Reported Fat and Healthy by Trappers

From Peace River District

The herd of Wainwright buffalo transported last summer to the Wood Buffalo National Park, Alberta, is already is thoroughly acclimated and has been taken under the care of the park. The herd, which was taken from the north, is now in the park.

It is believed that these animals either swim the Peace River in the summer or fall, or else crossed later over the ice. They were fat and healthy, with a fine winter coat and showing every evidence of being perfectly content in their new habitat.

It is pointed out that with the smaller animals under the protection of the wood buffalo herd, there is practically no danger of their being taken far. In the spring the old bulls will lead their more companionable herd, to the mud wallows and the succulent grass of the Wood Buffalo Park.

A few animals have been seen even farther south than Lake Athabasca. Buffalo rangers are watching the herd and will see that the animals head back across the Peace River should they show any inclination to go too far south.

The most annoyed persons in the Peace River district are the Indians. Following snowshoe trails and other tracks, the animals are reported to have roamed up and down the Peace River, and are reported to have been seen in the Peace River district.

Russians Seek Sunk Treasure

Making Efforts to Salvage British Ship From Balaikava Bay

Stokers of the Russian War Ship "Balaikava" are more anxious to be revived by the reported location of Black Prince, a British ship, which founded in Balaikava Bay.

For seventy years the British and Russian Governments at intervals have been searching for the ship, for when it was found it had about \$2,000,000 in gold. Recently Russian divers brought to the surface a mass of treasure, which is probably now being brought to the Black Prince. During the height of the Crimean War the ship entered Balaikava Bay with its cargo of gold and foodstuffs, medical supplies and ammunition for the attacking armies. A storm arose and the ship was wrecked, and the treasure was lost. The ship was foundered, the entire crew perished.

The great depth of the bay, which is placed at 700 feet, makes the work of divers difficult, but the Russian Government is hopeful the treasure of gold eventually will be retrieved.

Must Be Fifty-Fifty

Being Fair Is the Only Way to Keep Friends

A good man and woman are natural enemies in their relations with acquaintances and friends.

They are always want a little of the best of it, instead of accepting the fifty-fifty basis which real gentility exacts.

Man's friend has been lost by imposing on him a little at a time. Reciprocity is a good doctrine, but it will not work with severity per cent. on one side and thirty on the other.

If you have a friend, or an acquaintance who promises to become a friend, do not alienate him by always demanding a little of the best of it. He may stand it for a time, but finally he will rebel. W. Horne—Monthly.

Year Aluminum Teeth

Russian biologist found that aluminum teeth. The Leningrad Academy of Dentistry has found that crowns and bridges of dental material made of aluminum are better than those of gold or silver, but considerably cheaper.

Aluminum has the added advantage of being non-toxic. It is also the reaction of the various acids in the mouth.

Curing Northern Whitefish

The Maine Fish Company are now operating a factory for the curing and packing of whitefish.

The fish is taken from the lake in the month of August and it is reported that the experiment is proving to be successful and that there is a large demand for their product.

Heard an Ant-eater—What, sir?

Heard an Ant-eater—What, sir? I thought you said you were going to shoot something when I refused you.

Lovely! Lovely!—So I did, but I missed!

Volcanic Eruption of Mount McKinley

Followed by Spring-Like Weather

The return of volcanic activity to North America's loftiest peak, Mount McKinley, 28,320 feet high, indicated by the volume of smoke and steam rising from the mountain, and an earthquake felt here is one of the series of volcanic phenomena in which many observers saw a promise of milder and permanent climatic change for this southern part of Alaska.

Since Mount Shishaldin, in the Aleutian, 400 miles southwest of Mount McKinley, erupted on Nov. 11, this region has experienced a spring-like November and December, unparalleled in the memory of the oldest inhabitant.

Streams usually frozen at this season have remained open, and in place of the usual snowbound landscape is green vegetation. The affected area covers several hundred square miles, all about Cook Inlet, to the northwest of which Mount McKinley rises, and far up into the valley of the Sushana River. Anchorage had a February temperature of 23 degrees above on Christmas Day, when the mercury usually is around zero.

It is probable now that the warm air from Cook Inlet's heated waters has caused considerable melting of large glaciers, and a February temperature of 23 degrees above on Christmas Day, when the mercury usually is around zero.

Observers believe that subterranean gas are gnawing their way northward, producing temperatures below the surface which, like the Gulf Stream and the Japan Current, carry their warming influence. Geologists consider these subterranean gas currents as a factor in the land bridge between North America and Asia, and while no such major alteration is probable now, they think the end of the former bridge winters in this part of Alaska may be permanent.

Good Prospects For Canada

Outlook For This Year Is Brightest Since War

Canada is entering upon the new year with possibly the best prospects she has ever had. For some reason or other, whether it be her own making or that nature has been particularly kind to us, we have just passed through a year of good crops, our mining industry has been busy, our manufacturing industry has been active, and our commerce has been active.

In fact, the possibilities seem to be about all we could desire, and there is only one question left to be answered: "Are we prepared to make the most of our opportunities?"

If we sit down and wait for the day when we shall be able to do so, we may not see the light of our opportunities. If we sit down and wait for the day when we shall be able to do so, we may not see the light of our opportunities.

If we sit down and wait for the day when we shall be able to do so, we may not see the light of our opportunities. If we sit down and wait for the day when we shall be able to do so, we may not see the light of our opportunities.

If we sit down and wait for the day when we shall be able to do so, we may not see the light of our opportunities. If we sit down and wait for the day when we shall be able to do so, we may not see the light of our opportunities.

The Shortest Way

Young Man Followed Idea That Saved Him Trouble

John Philip Duce, famous band leader, said at a banquet in New York:

"I succeeded to grand opera here at home American girls first, go abroad and succeed in Paris, London, Milan and Naples. The longest way round in their case is the shortest way home, you see."

"It's like this," said the speaker, "I was a beautiful young girl who refused to marry you who first proposed."

"I said to Smith in the course of a confidential chat, 'I'd like to see you pursuing her (it she consented)'. 'Not much!' said Smith. 'I went out and made a fortune. After that she was the best of the pursuit.' (Chicago Daily News).

Jap Ambassador's Crier

The new Japanese minister to the U. S. is very charming. He belongs to that growing school of Japs which one might call American-Japanese. Like the American-Japanese, he was educated in America. He took his degree at the University of Virginia, afterwards at the University of California, and then at the University of St. John, Shanghai.

He speaks English and French perfectly. Short, sturdy, with a neatly-kept mustache, he is a very good speaker—he knows more about English literature than most Englishmen do—London Mail.

The best way for a spectator to improve her let for a house on the coast and put some good man in the house.

Travelling Historic Trails

A canoe Trip From Rainy River to the Hudson Bay

When Sir Alexander Mackenzie wrote his "General History of the Fur Trade" in 1801, he gave a vivid description of the routes followed by the fur traders from Montreal to the then great unknown northwest. Particular detail he gave to the route followed by the fur traders to the mouth of the Saskatchewan River, giving a most interesting running account of the many hardships and perils met with and the freedom of the unconventional and long to face and overcome difficulties and distances by primitive methods.

There is still a strong appeal in the old historic route is evidenced by the number of adventurous spirits looking to the district to satisfy their craving for something new. The natural resources information service of the department of the interior is now making already wide a number of inquiries for information. Two letters received the branch recently from widely separated portions of the United States, the writers which are making plans for canoe trips from Rainy River, Lake of the Woods, to the mouth of the Nelson River, and to show the spirit of the age, one of the inquiries was a woman.

The study of Canadian history is itself wonderfully fascinating, but it is also to have the routes of the fur traders, to see in reality the adventures that made their impressions upon the history, and to live over again the lives of Canada's original explorers.

Discussed

Rust Problem

Fields Sprayed With Sulphur Show Considerable Resistance

In the absence of what varieties free from the rust, experiments have been made with the use of sulphur dust. The results show that sulphur dust has offered great resistance to this destructive factor. In the fields of the University of Toronto, Government Research Laboratory, the Manitoba Agricultural College, told delegates attending the annual U. S. conference at Brandon.

A field treated with sulphur last fall, Dr. Bailey said, had produced a yield of wheat that was not infested with the rust of the same area. In general, he added, it had been found that adequate resistance had been found for the rust of the same area. In general, he added, it had been found that adequate resistance had been found for the rust of the same area.

The problem of rust with common wheats and aggregating rust-resistant hybrids of the best type had been rendered very difficult through sterility and shrinkage.

Sulphur spraying offered many different results and the aim of the work in this special field of research was the development of desirable corn hybrids, which investigation had proved to be the source of recurrent rust epidemics.

"We are just on the threshold of our knowledge of the rust problem," Dr. Bailey declared, but he obtained which gave real promise.

WARNING TO USERS OF RADIO

All Radio Receiving Sets
MUST be Licensed

Penalty on summary conviction is a fine not exceeding \$50.00
License Fee \$1.00 per annum

Licenses valid to 31st March, 1926, may be obtained from:
Staff Post Office, Radio Dealers, Radio Inspectors, or from
Radio Branch, Department of Marine and Fisheries, Ottawa

The proceeds from license fees are used to control broadcasting and to improve broadcast reception and conditions.
A. JOHNSTON, Deputy Minister of Marine and Fisheries

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; nor is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies in commerce is very properly regarded as a good investment.

Advertising is a good investment—just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

Don't miss the great musical treat on Friday evening next, treat on this Friday evening, February 19, in the I. O. O. F. Hall, when Miss Edna Reed of Edmonton, one of Alberta's most talented soloists, will give a recital. All lovers of good music and wholesome entertainment will find this a most enjoyable evening.

A number of farmers of the Claresholm District have formed a club, to be known as the Claresholm Clydesdale Club. The purpose of the organization is to promote the horse breeding industry. The club has been successful in lining under the Federal Government culling scheme one of the best Clydesdale sires in Alberta. Anyone interested in joining the club should make application at once to any of the following: O. J. Berg, president; R. A. Shearer, vice president; C. E. Buchanan, V. S., secretary-treasurer.

BUSINESS LOCALS

For Sale—Fine violin outfit for sale. Apply Don Colman, Claresholm.

Wanted—Hogs or cattle, finished or unfinished.—R. A. Shearer, Claresholm.

For Sale—10 head young males, one and two years old.—J. H. Armstrong, Stavelay.

Found—Flat key to fit a Miller lock, found last Saturday on floor of post office lobby. Owner can recover same at Review office.

Seed Wheat—I have for sale about 3,000 bushels of registered Marquis seed wheat, threshed before snow storm. Am running it through Carter disk mill. Price \$1.75 cleaned.—B. T. Cawson, five miles east of Stavelay.

Four Square Gospel

We preach Jesus Christ, and Him crucified.

Sunday, February 21st:

11 a.m. Worship.

2:30 p.m. Sunday school and Bible class.

3:15 p.m. Evangelistic service. Subject, "The solution for life's problems."

7:30 p.m. Evangelistic. Subject, "Lost, stolen or strayed."

Monday, Orchestra practice.

Tuesday, 8 p.m. Evangelistic.

Wednesday, 8 p.m. Young People.

Thursday, 8 p.m. Evangelistic.

Friday, 8 p.m. Prayer meeting at Bro. Staal's.

Come where the river of God's grace is flowing. Souls are being saved and receiving the baptism of the Holy Ghost as they did in the Acts of the Apostles. Miracles of healing are taking place. Jesus of Nazareth is in our midst. Holy Ghost sermons. Prayer for the sick every Sunday.

Good music and singing. Everybody welcome.

Nazarene Church Announcements

Friday night, subject, "Who shall ascend into the Hill of the Lord?"

Saturday, 8 p.m.: prayer band and healing service.

Sunday, 10:30 a.m., holiness meeting. Subject, "Elements of Fanaticism."

3 p.m. Sunday school.

3 p.m. meeting in Greenbank school.

7:30 p.m. Another great evangelistic meeting. Subject, "The Master Has Come and Called for Thee." Sinners: Is He calling and won't you lend a listening ear? Soon His second coming will be here. Will you be ready? Others are getting ready, why not you?
